4x4 Amp

HU6560

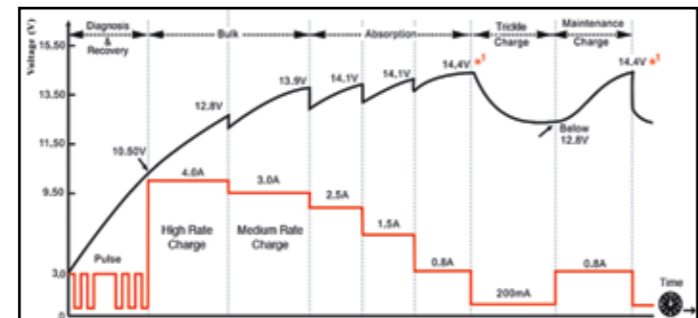

5 STAGE Lead Acid

Wet Gel MF EFB AGM Ca

1.2 to 120ah Batteries **12V**

- Rescues drained batteries over 3.0V
- Charges and maintains all lead acid batteries
- Fully automatic from charge to maintenance!!
- Dimensions: 260 x 246 x 63mm (LxWxH)
- **IP64 Protection**

Charging Phases

Calcium and Lithium Charging

Dedicated charging modes for 12V Lithium and Calcium
 Lithium - HU6552 & HU6554
 Calcium - HU6554, HU6556 & HU6558

Power Supply Function

Continuous power supply ideal for keeping vehicle preset information when changing a battery or running 12V appliances.
 HU6554, HU6556 & HU6558 only.

Boost Function

When batteries are frequently discharged or are left for long period of time, they become acid stratified and results in reduction of capacity and life. Boost function recovers battery from this condition. For optimal performance of batteries it is recommended to run this function once a year.
 HU6554, HU6556 & HU6558 only.

Temperature Sensor

All of our chargers are fitted with temperature sensors, which control charging according to the temperature of the battery charger. Our larger model HU6556 and HU6558 are provided with external temperature sensors which need to be placed near the battery to monitor temperature and in turn adjust charge voltage.

Digital Display

Hulk HU6558 is equipped with a backlit, easy to read LED display.

Interchangeable quick connect battery leads with battery clamps

Interchangeable quick connect battery leads with eyelet terminals

For difficult to access batteries. 6.3mm eyelet for Motorcycles, Lawnmowers etc
 8.3mm eyelet for Cars & Light Commercial.

12V Female cigarette adapter

For use with 12V DC accessories.

Quick connect cigarette plug

For battery charging, when ignition is switched off.

Unique snap connector

Provides fully secure and safe connection.

Waterproof construction.

Accessories suit all models except HU6556 & HU6558

Model	HU6550	HU6552	HU6554	HU6556	HU6558	HU6560

FULLY AUTOMATIC

SMART OPTION FOR COMPUTERIZED BATTERY CHARGING AND MANAGEMENT!

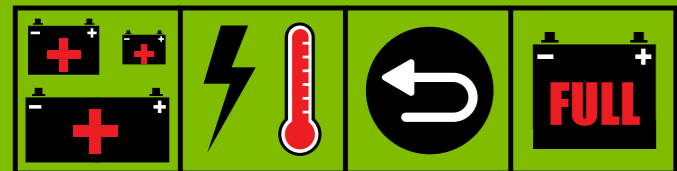

AUTOMATICALLY DIAGNOSES, RECOVERS, CHARGES AND MAINTAINS BATTERIES.

Hulk Professional Series Battery Chargers are multi-stage, fully automatic, switch mode battery chargers and maintainers capable of charging a variety of Lead Acid and Lithium rechargeable batteries. Lead Acid types include Wet/Flooded, GEL, AGM, MF, Calcium and EFB.

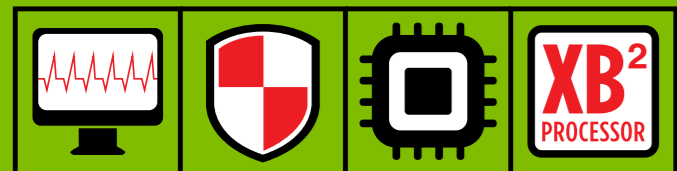

Hulk Professional Series Battery Chargers are amongst the most powerful and reliable battery chargers on the market. Hulk Professional Series Battery Chargers are MCU controlled which enables the battery charger to charge batteries much faster and safer than traditional battery chargers.

This state of the art technology enables the charger to return the battery to a fully charged state and can also recover slightly sulphated batteries. Hulk Professional Series Battery Chargers diagnose and rescue drained batteries and provide trickle and maintenance charging which increases battery life and provides superb performance.

Hulk Professional Series Battery Chargers can be left permanently connected without damage to the battery.

Rescues drained batteries and maintains all size batteries
 Spark proof technology and protection against overheating
 Memory function, returns to the last selected mode when restarted
 No risk of overcharging

Monitors battery activity
 Fully protected against short circuit & reverse polarity connections
 Automatically diagnoses, recovers, charges & maintains batteries
 XB2 Smart Processor makes the charger more powerful, smarter, faster & increases reliability

2 Year Warranty

Maintenance

1 Amp

HU6550

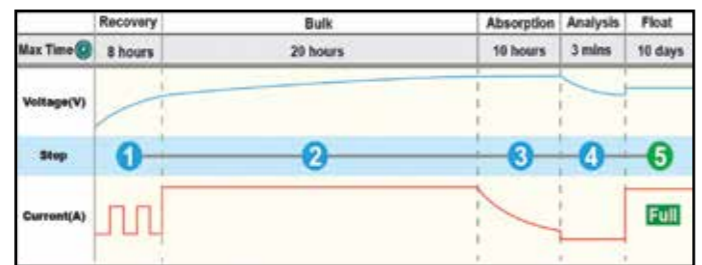

1.2 to 20ah Batteries 6V/12V

5 STAGE

- Charges all 6 and 12V lead acid batteries
- Maintains all battery sizes
- Rescues drained batteries over 2.5V
- Constant current charging
- Interchangeable deluxe clamp and ring snap connectors
- Direct plug-in type
- Dimensions: 110 x 65 x 39mm (LxWxH)
- IP60 Protection

Charging Phases

Versatile

3.8 Amp

HU6552

1.2 to 120ah Batteries 12V

7 STAGE

- Charges 12V lithium and lead acid batteries
- Maintains all battery sizes
- Memory function (Returns to last selected mode when restarted)
- Rescues drained batteries over 3.0 V
- Constant current charging
- Interchangeable deluxe clamp and ring snap connectors
- Dimensions: 189 x 63 x 49mm (LxWxH)
- IP65 Protection

Charging Phases

All Purpose

7.5 Amp

HU6554

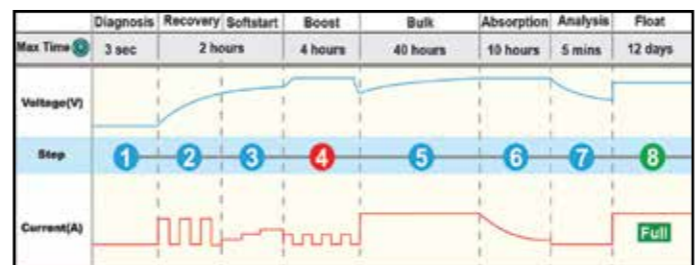

18 to 240ah Batteries 12V/24V

8 STAGE

- Charges 12 and 24V lead acid batteries
- Charges 12V calcium and lithium rechargeable batteries
- Memory function (Returns to last selected mode when restarted)
- Rescues drained battery over 2.0 V (for 12V Batteries) and 16V (for 24V Batteries)
- Power supply function (5A/13.6V)
- Constant current charging
- Boost function
- Interchangeable deluxe clamp and ring snap connectors
- Dimensions: 220 x 92 x 60mm (LxWxH)
- IP65 Protection

Charging Phases

Powerful

15 Amp

HU6556

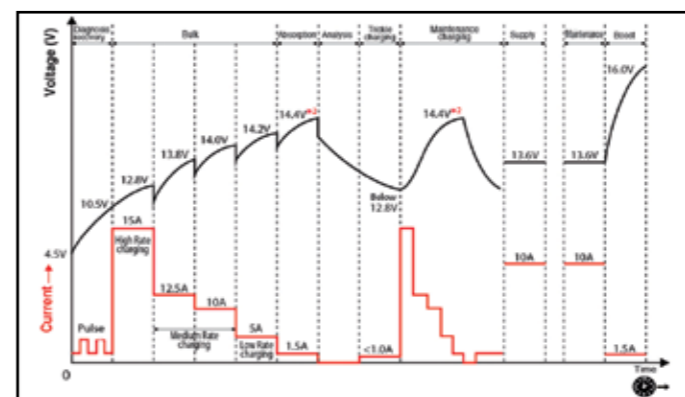

30 to 300ah Batteries 12V/24V

9 STAGE

- Charges 12 and 24V lead acid batteries
- MCU controlled, fully interactive
- Returns to last selected Mode when restarted
- Rescues drained batteries over 4.5V (for 12V batteries) and 16V (for 24V batteries)
- Power supply function (13.6V/10A)
- Provides maintenance charge (13.6V/10A)
- Dimensions: 260 x 135 x 70mm (LxWxH)
- IP65 Protection

Charging Phases

Professional

25 Amp

HU6558

50 to 500ah Batteries 12V/24V

9 STAGE

- Charges 12V and 24V lead acid batteries
- Power supply function (13.6V/12.5A)
- Returns to last selected Mode when restarted
- 12-Stage charging strategy
- Silent NIGHT Mode
- Rescues drained batteries over 4.5V (for 12V Batteries) and 16V (for 24V Batteries)
- Provides special manual maintenance charge (13.6V/12.5A)
- Dimensions: 260 x 135 x 70mm (LxWxH)
- IP65 Protection
